A message from the Director

Welcome to the Quality Center at **Prince Mohammad Bin Fahd University (PMU)**. The Quality Center is PMU's premier office that leads the execution of academic and institutional effectiveness plans. As private institution with global standards, **PMU** has emerged to become a leading university in the **Eastern Province of Kingdom of Saudi Arabia**. Our Quality Center is tasked to prepare and implement all strategic plans for PMU that are aimed at achieving effectiveness in all aspects of the University. The Quality Center provides guidance and training to our faculty and staff in the areas of and continuous improvement. PMU's Quality Center ultimate objective is to serve University Colleges and Units to achieve both academic and institutional accreditation from national and international accreditation agencies. The Quality Center also provides assistance to all PMU units to maintain these accreditations. PMU is currently pursuing accreditation from Kingdom of Saudi Arabia National Commission for Academic Accreditation and Assessment (NCAAA), Southern Association of Colleges and Schools (SACS) USA and Accreditation Board of Engineering and Technology (ABET) USA. PMU Quality Center is active in establishing assessment instruments that are in-line with internationally accepted accreditation standards.

For our faculty and staff, PMU's Quality Center is a resource that streamlines all quality assurance initiatives and outcomes. The mission and vision of PMU are the guiding principles that the Quality Center is established upon. In its essence, the Quality Center should significantly impact PMU's quest to achieve academic and institutional effectiveness and its drive to build leaders and graduate students with world class education.

I invite you to explore **PMU's** website and learn more about our success stories.

Dr. Emađ Y. Tanbour
Director of Quality Center and Institutional Relations
And A. Professor of Mechanical Engineering
